

Ravi Verma

Azure .NET Developer | Microsoft Azure | Generative AI

 raviverma9807@gmail.com |  [LinkedIn Profile](#) |  [GitHub](#)

PROFESSIONAL SUMMARY

Azure .NET Developer with **5.5+ years** of experience designing, developing, and supporting cloud-native applications using .NET Core and Microsoft Azure. Experienced in building scalable microservices, RESTful APIs, Azure integration solutions, and event-driven architectures across logistics, retail, healthcare, and utilities domains. Microsoft Certified Azure Developer with hands-on experience in Azure OpenAI, Azure AI Search, and Retrieval-Augmented Generation (RAG), combining modern cloud engineering with Generative AI solutions.

TECHNICAL SKILLS

- **Languages and Databases:** C#, SQL, HTML, CSS
- **.NET Technologies:** .NET Core, ASP.NET Core, MVC, Minimal APIs, Blazor, EF Core
- **Azure:** Functions, Service Bus, Event Hub, APIM, Logic Apps, Key Vault, Storage, App Insights
- **Architecture:** Microservices, REST APIs, Event-Driven Architecture, Distributed Systems
- **AI:** Azure OpenAI, Azure AI Search, RAG, Prompt Engineering, LLM Integration, Semantic Search
- **Tools:** Azure DevOps, Jenkins, Git, GitHub, Visual Studio, VS Code, Postman, ServiceNow
- **Testing & Debugging:** xUnit, NUnit, Moq, Unit Testing

PROFESSIONAL EXPERIENCE

Capgemini | Consultant

Mar 2025 – Present | Noida

- Architected and developed scalable REST APIs and integration services using **.NET Core and Azure**, enabling seamless connectivity across enterprise logistics platforms.
- Designed and implemented Azure-based integration solutions using **API Management, Azure Functions, Service Bus, Key Vault, and Application Insights** to support secure and scalable business workflows.
- Established monitoring, alerting, and observability practices using Azure Monitor and Application Insights, improving incident detection and operational visibility.
- Debugged and resolved complex application and integration issues across distributed systems, ensuring minimal downtime and improved system reliability.
- Collaborated directly with business stakeholders and client teams to analyse requirements, troubleshoot production issues, and deliver technical solutions.

TCS | System Engineer

Mar 2023 – Feb 2025 | Noida

- Developed and maintained microservices-based applications using **.NET 6/.NET 8, Minimal APIs, and Azure services** for large-scale retail platforms.
- Successfully participated in migration initiatives from **.NET 6 to .NET 8**, improving application performance, maintainability, and long-term supportability.

- Built enterprise integrations using **Azure Functions, Logic Apps, Service Bus, and Event Hub**, enabling reliable event-driven communication across systems.
- Utilized Visual Studio, Application Insights and Postman to diagnose, debug, and resolve application, API, and performance-related issues.
- Developed comprehensive unit test suites using **xUnit, NUnit, and Moq**, increasing code quality and reducing production defects.
- Built cloud integrations using Google Cloud Platform (GCP), Apache Kafka, Docker, and Control-M for enterprise healthcare solutions while supporting distributed event-driven architectures.

Infosys | Senior System Engineer

Nov 2020 – Feb 2023 | Hyderabad

- Designed, developed, and maintained enterprise web applications using **ASP.NET Core, MVC, Entity Framework, and SQL Server**.
- Built reusable application components and RESTful services following industry best practices and coding standards.
- Provided L2/L3 production support, troubleshooting critical incidents and ensuring high system availability.
- Managed incidents, service requests, and change implementations through ServiceNow processes.

PERSONAL PROJECT

AI-Powered Professional Portfolio | Azure OpenAI, Azure AI Search, Streamlit

- Designed and developed an AI-powered conversational portfolio using **Azure OpenAI, Azure AI Search, and Streamlit**.
- Implemented a Hybrid **Retrieval-Augmented Generation (RAG) pipeline combining Semantic Search, Vector Search, and text-embedding-3 embeddings** to retrieve context-aware information from a custom knowledge base.
- Applied **Prompt Engineering and LLM integration** to generate accurate responses.
- **Live Demo:** Click [here](#) | GitHub: Click [here](#)

CERTIFICATIONS

- AZ-204: Azure Developer Associate - [View Certificate](#)
- AZ-104: Azure Administrator Associate - [View Certificate](#)
- AZ-900: Azure Fundamentals - [View Certificate](#)
- AI-900: Azure AI Fundamentals - [View Certificate](#)

EDUCATION

B. Tech – Computer Science & Engineering | Ajay Kumar Garg Engineering College, Ghaziabad | 2016 – 2020 | CGPA: 8.41

ACHIEVEMENTS

- Recipient of Infosys Insta Award for outstanding performance and contribution.
- Recognized for resolving critical production incidents and ensuring high availability of business-critical applications.
